Introduction

Problems
Classification

Outputs and
Evaluation
Metrics

Conclusion

Goal: create a reliable, scalable and user-friendly benchmark to test the planning capabilities of LLMs on planning problems.

Keypoints

- Problems Classification
- Hardware Platform and LLM Models Selected
- Outputs and Evaluation Metrics

Metrics

Conclusion

This slide is used to show the structure of the repo, under the root folder we have:

- **analysis:** contains the material needed to write reports and the report itself.
- **archive:** contains material provided by the professor and a PDDL guide written to help understand key features of the PDDL.
- **Benchmark Framework:** main folder containing the work done to create this benchmark.

Conclusion

Now the Benchmark Framework folder is highlighted, note that to simplify not all the sub folders are shown.

- *evaluators*
- *Leonardo script*
- *outputs*
- *prompts*
- *runner*
- *scripts*
- *tasks*
- *utils*
- *run benchmark*
- *UTILS*

Evaluation
Metrics

Conclusion

I blocchi sono ottimi per evidenziare definizioni, teoremi o note.

Definizione Importante

Questo è un blocco standard per mettere in evidenza un concetto.

Attenzione!

Questo blocco serve per avvisi, errori o concetti critici.

Examples

Esempio Un blocco dedicato agli esempi (spesso di colore verde).
